CISSP

This intense 2 weeks course provides students a condensed seminar covering the knowledge and expertise required to confidently sit for the CISSP examination. As the first credential accredited by ANSI to ISO Standard 17024:2003 in the field of information security, the Certified Information Systems Security Professional (CISSP) certification proves to be a very challenging exam. As such, students should expect to spend significant hours outside of the core classroom hours for self directed reading and review.

Class Number	Start	End
CISSP 401-14	12/02/13	12/13/13
CISSP 402-14	03/10/14	03/21/14
CISSP 403-14	07/07/14	07/18/14

CISM

The 5 days course is to provide a common body of knowledge for information security management. The CISM focuses on information risk management as the basis of information security. It also includes material on broader issues such as how to govern information security as well as developing and managing an information security program and managing incidents.

Class Number	Start	End
CISM 501-14	05/19/14	05/23/14

NMS

The Network Manager Security (NMS) 5 days course serves as a highly recommended prerequisite to be taken prior to the Security+ course. Students are provided hands-on instructor led training with the tools, skills, technologies, and methodologies covered in the CompTIA Security+ exam. Through exposure and understanding, students who complete the Network Manager Security Course significantly enhance their chances of successfully obtaining their Security+ certification.

Class Number	Start	End
